Other information:

- We print your photos exactly as your camera captures them. Digital cameras most often use the aspect ratio 3:4. This leads to photo prints not in the format e.g. 10 x 15 cm (=2:3), but 10 x 13.33 cm (=3:4). Therefore, we only indicate the size of the smaller side.

- The digital photo optimiser (DPO) optimises the print result of JPG files that come directly from a digital camera. If you have scanned or edited the photos, we **strongly** recommend that you do not use DPO, i.e. tick the corresponding box.
